

Gasana Blessman | Data Scientist | Financial Analyst

Kigali, 00000, Rwanda | +250790720011

Gasanab5@gmail.com | www.linkedin.com/in/gasana-blessman-6a332820b

CAREER PROFILE

Results-driven data analyst with hands-on experience in loan analysis, predictive modeling, and data visualization using SQL, Python, SPSS and Power BI. Eager to contribute to a big company's mission of driving data-informed decisions and optimizing operational efficiency.

SKILLS

❖ TECHNICAL SKILLS

- Data Analysis & Statistical Modeling
- Predictive Analysis & Machine Learning
- Data Visualization & Dashboarding
- Database Management
- Data Collection & Data Cleaning
- Data Annotation
- Web Development
- Full Stack Development

❖ TOOLS AND SOFTWARE

- Python(Pandas, NumPy, Scikit-learn, Matplotlib)
- R,SPSS, Excel, Stata
- SQL, MySQL
- Power BI,Tableaux
- Kobo Toolbox
- Node.Js, HTML, CSS, PHP, type script, React
- Jira

❖ SOFT SKILLS

- Team Work, Leadership
- Communication, Story Telling
- Time Management
- Hard Work, Multitasking
- Attention to details

PERSONAL INFORMATION

❖ Languages Spoken

- **English:** Fluent
- **French:** Fluent
- **Kinyarwanda:** Native

❖ Hobbies / General Interests

- Data analytic Projects, Applied research
- Reading analytical and technical literature

❖ Computer Literacy : Advanced

EDUCATION

❖ Masters of Science (MSc), Financial Engineering

January 2026 – Present

WorldQuant University | Online

The coursework in Financial Engineering is Quantitative Finance, Risk Management, Time Series Analysis, Stochastic Processes, and Derivatives Pricing. Gained hands-on experience in financial modeling, portfolio optimization, and statistical analysis using Python and quantitative methods. Developed strong analytical foundations in pricing models, risk assessment, and data driven financial decision making.

❖ Bachelor of Science (BSc), Mathematics: Statistics

May 2022 – October 2025

University of Rwanda: College of science and technology | Kigali, Rwanda

Completed coursework in Statistical Modeling, Data Analysis, Predictive Analytic, and Probability Theory, with hands-on experience using R and SPSS for statistical modeling. Successfully conducted research on optimizing public transport schedules using Poisson Queue models.

Gasana Blessman | Data Scientist

PROFESSIONAL EXPERIENCE

- ◆ **Data Scientist, Researcher & Project Management (Full time)** **May 2026 – Present**
FINACCO HUB | Kigali, Rwanda
 - ❖ Designed and maintained scalable data pipelines to collect, process, and transform data from multiple sources for analytics and reporting. Conducted research and data analysis to generate actionable insights, supporting strategic decision-making and business growth. Managed project activities, developed dashboards, and collaborated with stakeholders to deliver data-driven solutions efficiently.
- ◆ **Full Stack Web Development (Internship)** **April 2026 – Present**
KLAB | Kigali, Rwanda
 - ❖ Developed and maintained responsive web applications using front-end and back-end technologies while collaborating with team members to deliver scalable software solutions. Assisted in database management, API integration, testing, and debugging to improve system performance and user experience.
- ◆ **Data Scientist (Professional Intern)** **November 2025 – May 2026**
MINEDUC - Higher Education Council (HEC) | Kigali, Rwanda
 - ❖ Analyzed and prepared higher education data to support policy, accreditation, and quality assurance decisions. Built dashboards and reports using Python, Excel, and SQL, applying statistical analysis and basic machine learning to identify trends and performance gaps.
- ◆ **Data Enumerator (Part time)** **February 2025 – Present**
UMURAVA - KIVU Choice | Kigali, Rwanda
 - Collecting field survey data using Kobo Toolbox and conducting face to face interviews to ensure accurate and complete responses. Performed data quality checks, uploaded data to the server, and maintained confidentiality in line with research standards.
- ◆ **Loan Analyst (Professional Intern)** **July 2024 – September 2024**
LOLC UNGUKA Finance | Kigali, Rwanda
 - Analyzed 50+ loan requests and used SQL to manage data, collaborating with bankers to streamline approvals and reduce processing time by 15%.
- ◆ **Data Science (Internship Simulation)** **November 2024**
British Airways | Online
 - Scraped and analyzed 10,000+ customer reviews using Python, built a predictive model with 85% accuracy, and delivered insights to enhance customer retention strategies.

Gasana Blessman | Data Scientist

VOLUNTEER WORK

- ❖ **COVID 19 Youth Volunteer** **2020 – 2021**
Buranga | Kigali, Rwanda
 - Conducted community awareness campaigns on COVID-19 prevention and vaccination.
- ❖ **Volunteer Photographer** **2024 – 2025**
MSAR (Mathematics and Statistics, Students' Association of Rwanda) | Kigali, Rwanda
 - Captured and edited photographs for community events and organizational activities, supporting communication, documentation, and social media engagement.

PROFESSIONAL CERTIFICATIONS AND TRAINING

- ❖ Python for Data Science | Saylor Academy | Completed: January 2025
- ❖ Advanced Business Intelligent and Analytic | Saylor Academy | Completed: February 2025
- ❖ Data management | Saylor Academy | Completed: March 2025
- ❖ Python coder | Kaggle | Completed: March 2025
- ❖ AI Essential | ALX | Completed: August 2024
- ❖ Data Enumerator Training | National Institute of Statistics Rwanda (NISR) | 1 week Training

PROFESSIONAL AFFILIATIONS

- ❖ **Mathematics and Statistics, Students' Association of Rwanda (MSAR)** **2023**
MSAR is registered under the University of Rwanda College of science and technology.

PROJECTS

- ❖ **Optimizing Public Transport Schedules Using Poisson Queue Models (Bachelor's Final Year Project)**
Addressed long waiting times at public transport stations by developing a predictive model using Poisson Queue equations to simulate arrival rates and optimize bus schedules. Utilizing Python and data visualization, the solution reduced average passenger waiting time by 20% during peak hours, enhancing system efficiency.
- ❖ **Healthcare Provider Fraud Detection Analysis**
Built a machine learning model using Logistic Regression and Random Forest to detect fraudulent claims in healthcare data. Utilized Python tools like Pandas, Scikit-learn, and Matplotlib to identify anomalies and reduce financial losses.
